

1 BILL NO. S-85-05-25

2 SPECIAL ORDINANCE NO. S- 93-85

3 AN ORDINANCE approving City Utilities
4 Purchase Order Numbers A-44375 and
5 A-44376, by the City of Fort Wayne
6 by and through its Department of
7 Purchasing with Woodward Tire and
8 McMahon Tire, for the City Utilities
9 Garage.

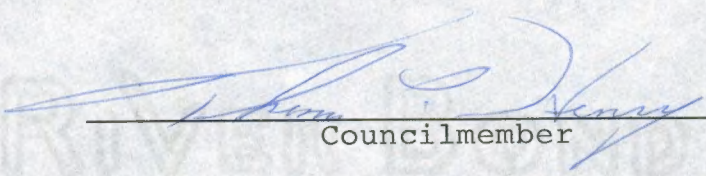

10 NOW, THEREFORE, BE IT ORDAINED BY THE COMMON COUNCIL OF
11 THE CITY OF FORT WAYNE, INDIANA:

12 SECTION 1. That City Utilities Purchase Order Numbers
13 A-44375 and A-44376, between the City of Fort Wayne, by and through
14 its City Utilities, and the Department of Purchasing with Woodward
15 Tire and McMahon Tire, for the City Utilities Garage, respectfully
16 for:

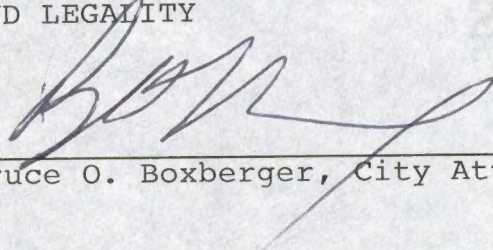

17 the awarding of a bid with respect to
18 the purchase of tubes and tires for
19 the City Utilities Garage;

20 involving a total cost of Seventy-Five Thousand and No/100 Dollars
21 (\$75,000.00) - (Woodward Tire - \$60,000.00; McMahon Tire - \$15,000.00)
22 all as more particularly set forth in said Purchase Orders, which
23 are on file in the Office of the Department of Purchasing, and are
24 by reference incorporated herein, made a part hereof, and are
25 hereby in all things ratified, confirmed and approved.

26 SECTION 2. That this Ordinance shall be in full force
27 and effect from and after its passage, and any and all necessary
28 approval by the Mayor.

**THE GOODYEAR TIRE & RUBBER COMPANY
AKRON, OHIO 44316**

Replaces B-272 (6-1-82)

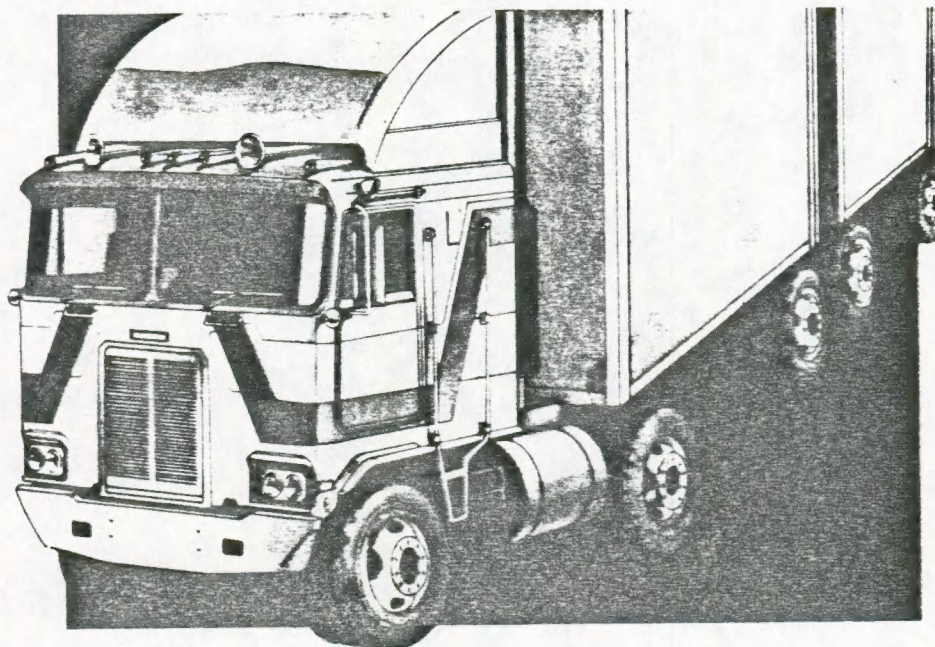

TO OUR CUSTOMERS

Our truck tire retreading program combines our experience in new tire design and manufacture with our long history in retreading to give our trucking customers quality and dependable service. We offer this service through skilled tire sales outlets and our customers can depend on our trained Commercial Tire Sales Engineers to recommend the best match-up of tread designs to their needs.

We use our new tire experience in designating tread rubber compounds to deliver long wear and traction. The tread rubber used is also formulated to promote longer casing life. We create the tread designs and determine tread depths to further insure the dependable service of both retread and casing.

Our factory trained personnel operate our retreading plants under our supervision and quality assurance follow-up. All this is done to see that our trucking customers get the quality they have come to expect from Goodyear. Our plants are located in our Truck Tire Centers to provide

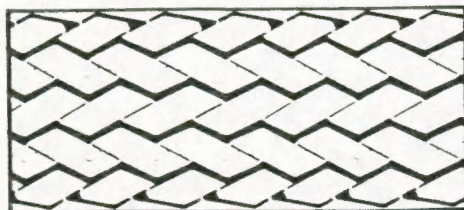

the accessibility and flexibility for all of our customers' needs. In addition to our retreading and repairing services, the Truck Tire Centers offer everything a trucker needs for a successful tire program.

Section, Reinforcement, and Spot repairs on over the road **RADIAL PLY** tires will be priced using the ply ratings above that correspond to the Load Range printed on the side of the tire.

EXAMPLE: 1000R20 UNISTEEL II is a Load Range "G" tire — therefore, the repairs would be priced the same as a 14 ply rating tire.

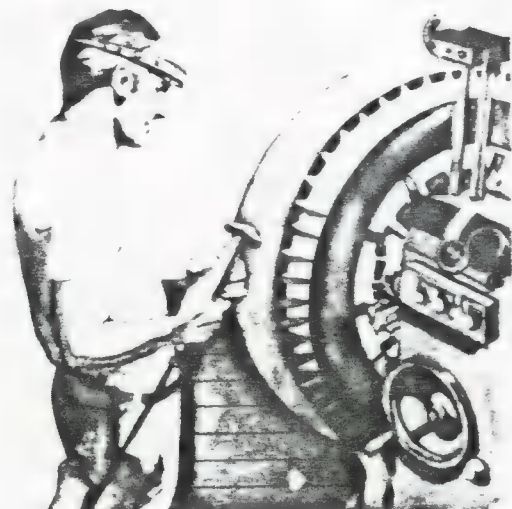

See following Load Range conversion chart.

Limited Warranty (Continued)

Adjustment Policy Limitations —

- Adjustments are subject to our examination of the retreaded or repaired tire.
- Retreaded or repaired tires presented for warranty consideration, must have been manufactured at a Goodyear owned retread facility.
- Retreads are considered fully worn at 2/32" tread depth.
- This limited warranty applicable only in the (50) United States and the District of Columbia.
- The following conditions are not covered by this limited warranty:
 - Irregular wear or tire damage due to mechanical condition of the vehicle, wreck, collision, fire, or road hazard.
 - Conditions resulting from improper inflation, overloading, mismatching, misapplication, misuse, negligence, racing, or use of chains.
 - Any condition resulting from intentional alteration (regrooving damage).
 - Loss of time, inconvenience, loss of cargo, loss of use of the vehicle, and/or consequential damage. (Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply).

Owners' Obligations —

- The customer should present tires covered under this warranty to a Goodyear Truck Tire Center or Goodyear outlet from whom the tires were purchased.
- The customer must pay for taxes and any additional services such as mounting and/or balancing ordered at the time of adjustment.
- No claim will be recognized unless submitted on a Goodyear claim form (supplied by the Goodyear outlet), completely filled out and signed by the user of the tire.

Legal Rights — This warranty gives the customer specific legal rights, and the customer may also have other rights which may vary from state to state.

FREIGHT POLICY Light and Medium Commercial Truck Tires (through 1800 cross section and tubeless equivalent) standard customer retreading and repairing will be returned freight prepaid on shipments up to 300 miles and over 2,000 pounds, excluding rejects and tires for repair only. All casings sent to the Retread Plant must be shipped freight prepaid.

SAFETY WARNING — Death or Serious Injury may result from:

- Tire Failure due to under or over inflation, overloading, and/or tire damage — follow owner's manual or tire placard instructions.
- Explosion of tire/rim assembly due to improper mounting — only specially trained persons should mount/demount tires.

WOODWARD TIRE SALES & SERVICE
3111 Covington Rd.
Fort Wayne, Indiana 46804

STATE OF INDIANA NET CONTRACT PRICE LIST

TIRES & TUBES QUANTITY PURCHASE AWARD

January 1, 1985 Through December 31, 1985

SAFETY WARNING

SERIOUS INJURY MAY RESULT FROM:

- Tire failure due to underinflation/overloading — follow owner's manual or tire placard in vehicle.
- Explosion of tire/rim assembly due to improper mounting — only specially trained persons should mount tires.

THE GOODYEAR TIRE & RUBBER COMPANY

Government Sales Department
AKRON, OHIO 44316

TIRE SIZE REPLACEMENT GUIDE

IF VEHICLE TIRE PLACARD SPECIFIES AN ALPHA-NUMERIC TIRE SIZE:
(All sizes are Load Range E or Standard Load unless noted.)

ALPHA-NUMERIC SIZE (78 SERIES)	ACCEPTABLE SUBSTITUTE SIZE. IMPORTANT—ADD 2 PSI ABOVE THE PRESSURE SPECIFIED ON THE VEHICLE TIRE PLACARD TO ASSURE ADEQUATE LOAD CAPACITY.

TIRE SIZE REPLACEMENT GUIDE

REPLACING CURRENT TIRES WITH "P" METRIC TIRES. Three important factors must be considered when replacing tires in use with P-metric tires. These same factors apply when P-metric tires are replaced with alpha numeric or other current available tire sizes.

LOAD AND INFLATION. Because of different load and inflation relationships of P-metric series and tire sizes currently in use there is no exact interchangeability between the different tires as far as loads and inflations are concerned.

A replacement tire size should be selected which has load carrying capacity equal to or greater than the original equipment tire size at the highest corresponding inflation pressure shown on the vehicle tire information placard (usually found on the driver's doorpost or on the glove box door). It may be permissible to use a replacement tire with slightly less load capacity (at the pressure referred to above for the original tire) by adjusting its inflation pressure upward to obtain the necessary load capacity.

WARNING: LOAD CAPACITY OF THE NEW REPLACEMENT TIRE AT THE NEW ADJUSTED INFLATION PRESSURE MUST ALWAYS EQUAL OR EXCEED THE LOAD CAPACITY OF THE ORIGINAL EQUIPMENT TIRE AT ITS RECOMMENDED INFLATION PRESSURE AS SHOWN ON THE VEHICLE TIRE INFORMATION PLACARD. NEVER EXCEED THE MAXIMUM PERMISSIBLE INFLATION PRESSURE SHOWN ON THE REPLACEMENT TIRE SIDEWALL.

DIMENSIONS It is necessary to verify that the new tire fits properly on the vehicle without rubbing or causing changes in steering. Clearance should be checked through suspension travel, including steering lock-to-lock at full jounce and rebound with vehicle weight on the front wheels.

CONSTRUCTION TYPE. Never mix different tire constructions (diagonal, bias belted, radial) on the same axle except for temporary use of a spare tire. Refer to the RMA Tire Application Guide if different tire constructions are mixed on the same vehicle.

IMPORTANT:

A. Consult vehicle tire information placard for recommended original equipment tire size(s) and recommended inflation pressure(s).

B. When changing tire sizes, adjust inflation pressure to obtain load capacity if necessary. Never exceed the maximum permissible inflation marked on the replacement tire sidewall.

C. Never mix radials and non-radials on the same axle except for temporary use of a spare tire. See RMA Tire Application Guide.

D. Do not mix different sizes on the same axle except for temporary use of a spare tire.

E. Refer to the RMA Tire Application Guide if different tire sizes are mixed on the same vehicle.

F. When changing tire sizes, dimensional clearances should be checked.

G. Rims should be checked for compatibility with replacement tire size.

Preferred

Preferred applications. For best all-around car handling performance, tires of the same size and construction should be used on all wheel positions.

Acceptable

Acceptable, but not preferred applications. Consult your car owner's manual and do not apply if vehicle manufacturer recommends against this application.

NO

NOT RECOMMENDED

*Courtesy of Rubber Manufacturers Association, Washington, D.C. 20006

*Courtesy of Rubber Manufacturers Association, Washington, D.C. 20006

IMPORTANT: ALWAYS CHECK THE VEHICLE MANUFACTURER'S RECOMMENDATIONS BEFORE REPLACING TIRES WITH DIFFERENT SIZES AND/OR CONSTRUCTIONS.

General Instructions

1. This chart is intended for use as a guide for tire applications on conventional passenger vehicles. Tires of different basic construction—diagonal (bias), belted bias and radial—may vary in series (profiles), dimensions and ride characteristics. These differences may seriously affect vehicle handling characteristics.

2. Adherence to recommended inflation pressures is important for proper vehicle and tire performance. Follow the recommendations of the vehicle or tire manufacturer.

3. SIZES—Never mix different tire sizes on the same axle, except for temporary use of a spare tire (See item 8).

4. CONSTRUCTION—Never mix different constructions (diagonal (bias), belted bias, or radial) on the same axle except for temporary use of a spare tire (See item 8).

5. STATION WAGONS AND ALL VEHICLES USED IN TRAILER TOWING SERVICE—It is recommended that tires on all wheel positions of these vehicles be of the same size and construction (diagonal (bias), belted bias, or radial). These vehicles may require a Load Range C or D tire.

6. WORN TIRES—It is preferred that tires having approximately the same amount of tread depth remaining be placed on the same axle.

7. TIRE ROTATION—When rotating tires on vehicles having different tire sizes or constructions, be certain to recheck this Guide for permissibility of relocated tire positions.

8. SPARE TIRES—A vehicle manufacturer may designate a spare tire which differs in size designation and/or construction from the tire on the opposite end of the axle. A passenger car may be operated while equipped with such tires only when enroute to a service facility for tire repair or replacement with one of the proper tire size designation and/or construction. Advise customer to see manufacturers instructions for use of spare tire.

LIMITED WARRANTY

HIGHWAY TIRE ADJUSTMENT POLICY

FOR STATE AND LOCAL GOVERNMENT ACCOUNTS

ELIGIBILITY

You are eligible for the benefits of this policy if you are the owner or authorized agent of the owner of new Goodyear highway tires (including mud and snow and on/off-road tires, but excluding motorcycle tires) bearing Department of Transportation prescribed tire identification numbers and not branded "NA" (Not Adjustable) and if your tires have been used only on the vehicle on which they were originally installed according to the vehicle manufacturer's or Goodyear's recommendations.

COVERAGE (REPLACEMENT FREE) RADIAL AUTO AND RADIAL TRUCK TIRES

Any new Goodyear highway radial auto tire or radial truck tire covered by this policy, that does not deliver satisfactory highway service due to a workmanship or material-related condition (see Adjustment Policy Limitations) during the first 25% of usable treadwear, or twelve months from date of purchase, whichever comes first, will be replaced with a comparable new Goodyear tire without charge. Mounting and balancing are included for auto tires only.

ALL OTHER HIGHWAY TIRES

Any new Goodyear highway tire, other than radial auto or radial truck tires, that does not deliver satisfactory highway service, due to a workmanship or material-related condition (see Adjustment Policy Limitations), during the first 10% of usable treadwear will be replaced with a comparable new Goodyear tire without charge. Mounting and balancing are included for auto tires only.

Any Goodyear temporary spare tire that does not deliver satisfactory highway service due to a workmanship or material-related condition during the first 50% of usable tread depth (1/32nd of an inch) will be replaced with a comparable new Goodyear temporary spare tire without charge. Mounting is included. After the first 50% of usable treadwear you pay only an adjustment charge for the treadwear received.

COVERAGE (PRORATED ADJUSTMENT)

Tires not eligible for no charge adjustment that do not deliver satisfactory service due to a workmanship or material-related condition will be replaced with comparable new Goodyear tires on a prorata basis. The replacement price will be calculated by multiplying the current Goodyear advertised price at adjustment location or "net state price" (whichever is lower) by the percentage of usable original tread that has been worn off at the time of the adjustment. You pay for mounting and balancing.

EXAMPLE: If your disabled tire had an original 8/32nd of usable treadwear and is worn to 4/32nd usable tread remaining, you have used 50% and, therefore must pay 50% of the advertised price or net state price of the comparable tire. If the price of the new comparable tire is \$80.00 the cost to you would be \$40.00.

If a "current net state price" for truck and other commercial highway tires is not available, adjustment will be based on the price at which you are entitled to buy at the time of adjustment.

A tire has delivered its full original tread life and this warranty ends when the treadwear indicators become visible regardless of age or mileage.

DEFINITION OF COMPARABLE TIRE

A "comparable" new Goodyear tire may either be the same line of tire or, in the event the disabled tire is out of production, the same basic construction and quality with

different sidewall or tread configuration. If a higher priced tire is accepted as replacement, the difference in price will be additional.

Any tire replacement under this warranty will be covered by the Goodyear Warranty in effect at time of replacement.

ADJUSTMENT POLICY LIMITATIONS

This limited warranty is applicable only in the United States and Canada.

No representative or dealer has authority to make any representation, promise or agreement on behalf of Goodyear except as stated herein.

The following are not covered by this policy:

- Goodyear does not warrant and will not give credit in any adjustment transaction for any kind of material added to the tire after leaving a Goodyear factory, nor will it adjust any tire which has failed as a result of adding any such material. (EXAMPLE: Tire fillers, sealants, or balancing substances.)
- Irregular wear or tire damage due to:
 - Road Hazard, Wreck, Collision or Fire.
 - Improper Inflation, Overloading, High speed spinup, Misapplication, Misuse, Negligence, Racing, Chain Damage or Improper Mounting or Demounting.
 - Mechanical Condition of the Vehicle.
- Ride disturbance after the first 25% of usable treadwear or due to damaged wheels or any vehicle condition.
- Temporary spare tires used on vehicles used in racing and on passenger cars in special applications such as police pursuit service.
- Any tire intentionally altered after leaving a Goodyear factory to change its appearance. (Example: White inlay on a black tire.)
- Tires with weather cracking which were purchased more than four (4) years prior to presentation for adjustment. If you have no proof of purchase date, tires manufactured four (4) or more years prior to presentation are not covered.
- Loss of time, inconvenience, loss of use of the vehicle or consequential damage.

Some states do not allow the exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.

Any tire no matter how well-constructed may fail in service or otherwise become unserviceable due to conditions beyond the control of the manufacturer. This warranty is not intended as a representation that a tire failure cannot occur.

OWNER'S OBLIGATIONS

- A. You must present the tire to be adjusted to a Goodyear Auto Service Center or Goodyear Tire Dealer. (Please consult telephone directory for locations.) Tires replaced on an adjustment basis become the property of The Goodyear Tire & Rubber Company.
- B. You must pay for taxes or any additional service you order at the time of adjustment.
- C. No claim will be recognized unless submitted on a Goodyear claim form (supplied by Goodyear Dealer or Auto Service Center) completely filled out and signed by you, the owner of the tire presented for adjustment or your authorized agent.

LEGAL RIGHTS

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

OFF-THE-HIGHWAY TIRE ADJUSTMENT POLICY

LIMITED WARRANTY FOR STATE AND LOCAL GOVERNMENT ACCOUNTS

ELIGIBILITY

You are eligible for the benefits of this policy if you are the user or authorized agent of the user of new Goodyear off-the-highway tires bearing our serial numbers and not branded "NA" (not adjustable).

Off-the-highway tires are defined as tires whose principal design is for specialized service in other than normal highway operation and which do not bear Department of Transportation prescribed identification numbers.

COVERAGE

Any tire covered by this policy that becomes unserviceable from a workmanship or material-related condition will be replaced with a comparable new Goodyear tire on a prorata basis. The replacement price will be calculated by multiplying the current Goodyear "Net State Price" or current advertised price at adjustment location (whichever is lower) by the percentage of original tread that has been worn off at time of Adjustment.

If a Goodyear "Net State Price" is not available, adjustment will be based on the price at which you are entitled to buy at the time of adjustment.

Replacement tires received under this warranty will be covered by the warranty Goodyear then gives on those tires.

ADJUSTMENT POLICY LIMITATIONS

This Limited Warranty is applicable only in the (50) United States, District of Columbia, and Canada.

No representative or dealer has authority to make any representation, promise, or agreement on behalf of Goodyear except as stated herein.

The following are not covered by this policy:

- Airplane or racing tires.
- Irregular wear or tire damage due to: impact breaks, cuts, snags, machine damage, wreck, collision, or fire. Improper inflation, overloading, misapplication, misuse, negligence, speed, rim, or chain damage. Mechanical condition of the vehicle.
- Earthmover haulage tires
Operating in excess of the tire rated **ton-mile-per-hour (TMPH)** factor.
- Earthmover loader tires
Operating in excess of the tire rated **work capability (WCF)** factor.
- LOSS OF TIME, INCONVENIENCE, LOSS OF USE OF VEHICLE, OR CONSEQUENTIAL DAMAGE.

OWNER'S OBLIGATIONS

- a. You must present the unserviceable tire to a Goodyear Auto Service Center or participating Goodyear dealer. (Please consult telephone directory for locations.)
- b. You must pay for mounting, balancing, or any additional services you order at time of adjustment.
- c. No claim will be recognized unless submitted on a Goodyear claim form (to be supplied by Goodyear dealer or Auto Service Center) completely filled out and signed by you, the owner of the tire presented for adjustment or your authorized agent.

SAFETY WARNING

SERIOUS INJURY MAY RESULT FROM:

- Tire failure due to underinflation/overloading – follow owner's manual or tire placard in vehicle.
- Explosion of tire/rim assembly due to improper mounting – only specially trained persons using proper equipment should mount tires.

Caution: Always deflate single or dual assemblies completely before demounting.

GOODYEAR

GOVERNMENT SALES DEPARTMENT
THE GOODYEAR TIRE & RUBBER COMPANY
1144 EAST MARKET STREET — AKRON, OHIO 44316

NEWSLETTER

February 14, 1985 D-45

GENERAL TIRE
STORES AND DEALERS

SUBJECT: Net State/FOM Price List 1-1-85
Rev. #1 of 1-29-85

REF: HP2000 & HP2000H
High Performance Tires

We are pleased to enclose the subject revision which covers our new high performance tires which are rated as follows:

HP2000 @ 118 MPH
HP2000H @ 130 MPH

These tires are not qualified to any state or federal spec as "pursuit tires". They may, however, be sold without any restriction to use to any customer including police departments, etc., that desire to use them.

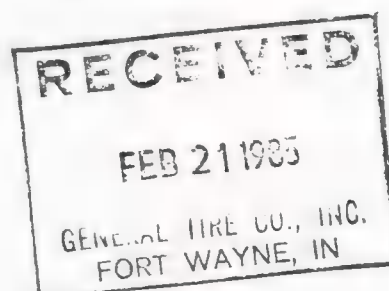

Sincerely,

GENERAL TIRE
A GENCORP COMPANY

G. E. Pinkel
Government Sales

DEFINITION OF TERM "LOAD RANGE" AND LETTERS (A, B, C, ETC.) IN TIRE IDENTIFICATION

Load Range	Replaces Ply Rating
A	2
B	4
C	6
D	8
E	10
F	12

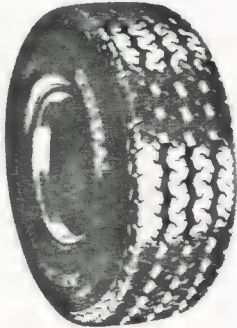

Load Range	Replaces Ply Rating
G	14
H	16
J	18
L	20
M	22
N	24

NOTE:

Tires should always be replaced with the same size designation or approved options as recommended by the automobile or tire manufacturer. Interchangeability, or intermixing, of different types or profiles of tires is not always possible due to differences in load ratings, handling characteristics, clearances and rim sizes. Be sure to check the recommendations in owner's manual or the tire chart affixed to car before replacing or mixing tires.
